Kids Ages 2-5 Had Higher Rate of Convulsions After mRNA COVID Shots

According to FDA researchers, the higher rate of febrile seizures from the mRNA COVID-19 vaccines "is not large compared to some other vaccines and combinations of vaccines" that can cause seizures at higher rates.

By Brenda Baletti, Ph.D.

32

DIAGNOSIS
FEBRILE SEIZURES

Miss a day, miss a lot. *Subscribe to The Defender's Top News of the Day.* ***It's free.***

Children ages 2-5 who received the COVID-19 mRNA vaccine faced an increased risk of febrile seizures immediately following vaccination, according to a new study led by researchers at the U.S. Food and Drug Administration (FDA).

The preprint study found children who received the Moderna shot were 2.5 times more likely to have a febrile seizure within a day of being vaccinated than they were to have one between eight and 63 days following vaccination.

The incidence rate ratio was "significantly elevated," the researchers wrote, but the "absolute risk" — the risk of having a seizure following vaccination, was low within the first day following vaccination.

FDA researchers also found a higher risk of febrile seizures among children ages 2-4 on the first day following the Pfizer vaccine than in the 8-63 days following vaccination. However, that increased risk was not statistically significant, the researchers reported.

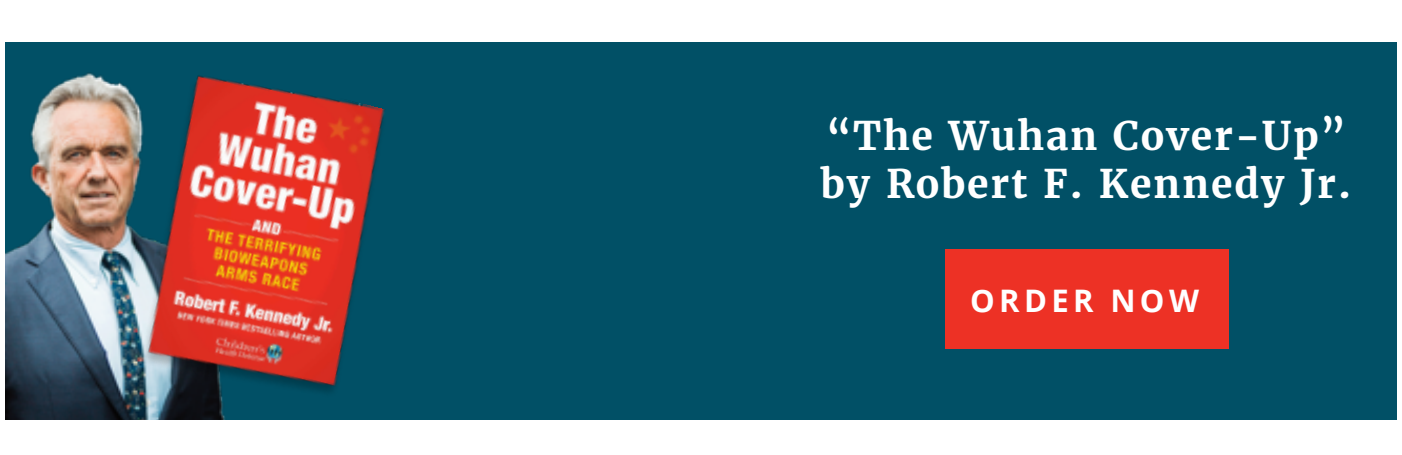
"Based on the current body of scientific evidence, the safety profile of the monovalent mRNA vaccines remains favorable for use in young children," the researchers concluded.

Dr. Michelle Perro, a pediatrician and co-author of "What's Making our Children Sick?" told The Defender that the way the authors mixed different measures of risk in their reporting obfuscated the findings.

"This paper buried itself in statistical gymnastics and made it difficult to assess their true findings," despite their claim that the safety profile remains favorable, Perro said.

"Based on their own data, I would advise that this vaccination is risky due to the probability of the occurrence of non-febrile seizures in a small population of vaccinated children, along with the fact that we don't know what other future effects might be," Perro said.

The FDA's Richard A. Forshee, Ph.D., led the team of researchers who came largely from commercial health claim database companies — Carelon Research, CVS Health and Optum — that contributed data to the analysis.



"The Wuhan Cover-Up"
by Robert F. Kennedy Jr.
ORDER NOW

Safety signal led to study

After the FDA authorized Pfizer and Moderna's COVID-19 vaccines in June 2022 for emergency use in children ages 6 months and older, the agency's Center for Biologics and Evaluation Research conducted the mandatory near-real-time safety monitoring.

The agency detected a signal for seizures/convulsions after both one and two doses of the vaccines among children ages 2-5 who received the Moderna vaccine and children ages 2-4 who received the Pfizer vaccine.

Further evaluation of the signal was necessary, the researchers wrote, because the agency's surveillance was "designed to be sensitive but not specific for screening and detection purposes."

The FDA had monitored seizures/convulsions for seven days following vaccination and found that febrile seizures were the most common event, so they made those the primary object of analysis.

Forshee and his team analyzed data on COVID-19 vaccination and medical claims regarding seizures among children ages 2-5 from several medical claims databases.

The study excluded children who had received more than the recommended number of vaccine doses. All study periods began when the vaccines were authorized for children in June 17, 2022.

The data from the Carelon database extended through Feb. 4, 2023. The CVS database extended through March 26, 2023, and the Optum database extended through May 20, 2023.

The research examined only the original emergency use authorized monovalent vaccines.

The CDC now recommends that children ages 6 months to 4 years get two to three doses of the updated Moderna or Pfizer vaccines and children ages 5 and up get one dose.

RFK Jr. and Brian Hooker's
New Book: "Vax-Unvax"
ORDER NOW

'There ought to be an unvaccinated control group'

The study was "self-controlled," meaning the researchers compared the likelihood of a child having a febrile seizure on the day of or the day following vaccination to having one later, in the 8-65 days following vaccination.

That two-day window was selected as the time a seizure would most likely be associated with vaccination rather than other causes.

In total, 288,754 Pfizer shots and 192,540 Moderna shots were administered to children in the study group.

Eighty-eight cases of febrile seizures occurred following the Pfizer vaccine and seven of those occurred within the two-day window being analyzed.

There were 67 cases of febrile seizures following the Moderna vaccination and 10 of those happened within the two-day window. A higher proportion of the febrile seizures occurred among 2-year-olds compared to all other groups.

The researchers excluded seizures that happened between 2-7 days from the primary analysis.

Perro said it was noteworthy that the overwhelming majority of cases occurred during the control interval (days 8-63) and this pattern was observed with both types of mRNA vaccinations.

"This in itself is concerning," she said.

The authors also included a secondary analysis using a longer risk interval of 0-7 days following vaccination. They found 103 cases of febrile seizures and 135 cases of seizures/convulsions observed following the Pfizer vaccine. Of those, 22 of the febrile seizures and 32 cases of seizures/convulsions happened within seven days following vaccination.

There were 78 cases of febrile seizures and 106 cases of seizures/convulsions following the Moderna vaccine. Of those, 21 febrile seizures and 28 cases of seizures/convulsions happened within the first seven days.

These secondary results, they wrote, were not "statistically significant."

"The majority of the seizures as per their own data are occurring after the fevers, so by definition, they are not febrile seizures, but seizures," Perro said.

"The sequelae of having a febrile seizure and a non-febrile seizure are clinically very different, with unknown ramifications for the future of the child," she added.

Brian Hooker, Ph.D., chief scientific officer for Children's Health Defense and co-author of "Vax-Unvax: Let the Science Speak," also had serious concerns about the study's methods and findings. He told The Defender the study was "a hot mess."

First, he said, it was not appropriate to do a "self-controlled study" to determine whether seizures were associated with two experimental vaccines. There ought to be an unvaccinated control group, he said.

The statistically significant result for the Moderna vaccine is "extremely shocking and would perhaps be more dramatic if the study was appropriately controlled."

As for the Pfizer vaccine, Hooker said the inconclusive results "belie the limited statistical power of this type of study," rather than indicate anything about the actual risk.

He also said, "Any febrile seizure even within the control window which extends out to 63 days is notable and can't be dismissed as 'unrelated to the vaccine.'"

The researchers noted that "febrile seizures occur at a rate of up to 5% in young children" and that the increased rate they found from the mRNA COVID-19 vaccines "is not large compared to some other vaccines and combinations of vaccines" that can cause seizures at higher rates.

The authors noted the "significantly increased incidence" following Moderna's shot but not Pfizer's could indicate that, "the difference in formulation of the two vaccinations may yield a different immune reaction."

Forshee did not immediately respond to The Defender's request for comment.

The ignorance of the medical profession is profound....to have gone alone with vaccine manufacturers who claimed the safety of their products.
vaccine mfgrs. were going out of business from all the multi-million dollar lawsuits for dangerous and defective products. Our Congress saved the vax promoters and gave them NON-LIABILITY for injuries nd deaths...Let the buyer beware. The victims paid many times over for this rotten legislation ...The National childhood Vaccine Injury Act of 1986. Those who turned a blind eye are as guilty as the rest. How do they live with themselves knowing they have used their medical degrees to injure and kill those who came to them for help?

"Its A Sin"
They are still giving these JABS!

CDC Admits Thousands of Vaxxed Children Are Dying Suddenly
The U.S. Centers for Disease Control and Prevention (CDC) has quietly released explosive data that confirms tens of thousands of vaxxed children have "died suddenly."

A bombshell report from the CDC shows that **120,000 American children died unexpectedly following the rollout of the mRNA Covid jabs.**

The disturbing news has been greeted with silence by the mainstream media, who apparently do not consider the deaths of more than one hundred thousand American children to be of any consequence.

All through 2021, Democrat President Joe Biden's administration and then-chief medical advisor Dr. Anthony Fauci continued to insist that the Covid jabs were "safe and effective" for all ages, and necessary for protecting kids from the virus, despite children only showing mild symptoms if any at all.

More sinister, is the imposition of non-consensual classified brain surgical experimentation, presenting adverse effects of seizures, continual episodes of cerebral hemmorrahaging in the operative field, and PTSD if subjected to a local cranium incision, and unauthorized brain tissue transplant. So in order to address the adverse effects of seizure disorder, one is coerced into brain mutilation, and exploitation, with no transparency and accountability. There is no public safety and security, until we have another Nuremberg Code trial, and address the needle and the damage done.

Why are parents still vaccinating their children in 2024? I know about the pressure. I know about the system that mandates vaccines for children. In Massachusetts, home of dumb, obedient Catholics who do what they are told, and the fascist Communists at Harvard, MIT, Boston College, Northeastern U, and the other violent universities, they follow the rules of the corrupt CDC and FDA. And you think these people are smart? They are idiots. And don't forget the fake Christian/Catholic churches who push vaccines because they don't t have the courage or the knowledge to face the truth about vaccine reactions and deaths. Vaccines have always injured and killed. The historical information is indisputable. You'd have to me a mental moron not to know that in 2024. The Massachusetts politicians, all Democrats, are a bunch of gutless men and women who pimp for big Pharma. They pay no attention to the deaths caused by vaccines. I have spoken to them. They are not men. They are roaches. They should all be arrested for assisting in the molestation of our children by the vaccine hungry pediatricians. This is what we have today and what we have had for the the last 224 years. Massachusetts is a fascist state. Vaccines kill every year and the politicians do nothing.

You really need to stop referring to these mRNA Gene Altering Bioweapons as "vaccines"!!! I know that CHD does a lot of good work; but minimizing the threat of these bioweapons by calling them "vaccines" is not helping. Do you even give a thought to people who are new to current (truthful) information, who have never even heard of mRNA technology. When you call them "vaccines", these people believe that they are nothing but vaccines. When you're trying to explain to people how deadly these nanobot shots are; referring to them as "vaccines" is not getting the message across as to how dangerous these injections are. Bottom line: "Vaccines" are closely associated (by far too many people) as "Safe and Effective". Bioweapons are not; although, they are effective at causing death and destruction!

"Gene Therapy" or just Jabs!
1 0 Reply

Ricky Ricardo → GarySummers
a month ago
The reason that I take issue with the term "therapy" or "therapeutic" is because that term denotes "treating illness", improving one's health, making a sick person well. The death shots do the opposite. They maim and kill. That's why I refer to them as Gene Editing, Gene Altering, etc....or, simply a bioweapon. They all accurately describe what that injection really is.

Government control (bureaucracies) have become nothing if not a big trough from which the bureaucracies all dip their snouts like pigs. When the trough begins to empty to the last morsel, the people farmers who refill the trough who thought they owned the farm do so at the "democratic" behest of the pigs who at best have complained to the farmers that without them the people farmers would not have fertilizer to grow their feed.
Corporations, (private entities) have their own methods of manipulation, but by and large they must be responsible to the people that "sequela" it. The government bureaucracies, in the name of the people farmers get to regulate (Socialize) the corporation. The abuse of this "democratic" method has over six decades grown exponentially, specifically in the last three decades since the 1990's (Clinton) initiation of the uniparty that immediately made Communist China, and Vietnam, "bestie" nations par greed. Simultaneously the skilled manufacturing juggernaut of the United States was gutted. As anyone without hubris (arrogance) might suspect, once one hitches Communism's corruption wagon to the Free Market Van, eventually the wagon pulls the Van. The influence and blackmail that now becomes home or farm grown exponentially between government bureaucracy and Corporate entities is now horribly obvious.
In the 1960's there were warnings of Communist and Fascist infiltration post WWII. It was as if the Axis of evil was following American soldiers home. That warning was resoundingly

Each of us are responsible for what has transpired... As a pastor presented: we are not on a Caribbean Cruise Shipin Life...its a Battleship: and the point of no return is right here right now. If this election can no longer be fair and free..then this land is the target of each and every gang, cartel, cell early released prisoners/mentally ill, diseased..to hierarch elites who fly into DAVOS on jets and have 20Plus gas vehicles while dictating the paradox to us as if we are ants to step upon.
So we have to ask ourselves: what have we done: each do--what can we do...? How, step by step? or we are responsible for the takedown of our entire existence..and it will be lik3 2020..Israel and everything every enemy can do...since there are groups trained from their nation... Central America 200 buses supplied via Panama-Via CCPM, Costa Rica. UN, W.H.O, CCPM Military Base: and all the NGO's extorting tax dollars and via the Soros, Gates WEF. etc. There are still more of us...My DNA did not give all and have all taken so we could sit around and declare " G O D is in control!" in million to billion to trillion dollar Real Estate Conglomerates and Walled Cities of GOLD.. DO UNTO OTHERS AS IT WILL BE DONE UNTO us... Which side is winning--presently...

"Top Doctor Issued Red Alert: 'Pregnant American Mothers Are Now Dying at Alarming Rates'"

One of the world's most highly respected doctors has just issued a red alert over the "alarming rates" at "pregnant American mothers are now dying."

Dr. Peter McCullough, a leading American cardiologist, warns that deaths of pregnant mothers started skyrocketing in early 2021.
McCullough, who previously served as vice chief of internal medicine at Baylor University Medical Center and a professor at Texas A&M University, suggests that health officials are covering up the true cause of the devastating issue.

Maternal **deaths are soaring in America** among Cocid vaccinated mothers, McCullough testified.

However, the CDC claims it "doesn't know" what's causing it.

"The researchers excluded seizures that happened between 2-7 days from the primary analysis."

A cherry picker. During the Pfizer trial, suspected Covid cases unconfirmed, were excluded from efficacy calculation. It enabled a dramatically higher efficacy rating.

"...the "absolute risk" — the risk of having a seizure following vaccination, was low within the first day following vaccination."

The absolute risk reduction of the mRNA Covid shots were about 1%, negligible. It didn't prevent contracting Covid. That number was hidden from the public. On the seizures, cherry picking the first day doesn't explain whether there is an excess rate of seizures over time, compared to before Covid shots.

Democracy, can be the claim of any State. Democracy without dissent is the ruse, not just the rub. The key to open the gates of the unique Constitutional Republic welcoming in the Trojan horse(s) are the nuances of the pure liberal democracies long dead. The Founders, in their wisdom implored one another to make the right to dissent the catalyst of their Constitution, the antithesis of censorship. The uniqueness of the American Constitution is its simplicity of science, accepting that without error, truth cannot be ascertained, thereby remaining humble, noble in the pursuit of truth as opposed to hubris (I am science) tyranny unbound.
The purpose for the Founders going forward then was to protect democracy (the vote), not to be defined by it, while simultaneously tethering democracy from cannibalizing itself with fickle liberal platitudes of victimhood and meaningless equity. But, in the new Democratic America post WWII infiltration, there can be no error, for fears sake, remember Mr. Guillotine and the Gulags. Therefore the imperfect Founders' statues must be removed by the State under the rub and ruse of the New all inclusive global democracy because inverted nuance proves them erroneous, not perfect.
The intent of nuancing (perfecting) democracy is not just upside down, it is an insidious multi faceted attack on democracy that will cannibalize itself.
